

## Specification Sheet for Coats Dabond 2000

**Bonded Polyester**

**Stock Code TRDP2**

Coats Dabond 2000 is a bonded, twisted continuous filament polyester thread. Combining superior sewing performance with excellent UV and abrasion protection

### Key features

- specifically designed to provide resistance against harsh weather conditions.
- can withstand UV degradation in all outdoor applications that are exposed to marine water and sunlight.
- Unique bonding technology that safeguards against ply untwisting in zig zag sewing and can sew through many layers of heavily finished fabric.
- Dual level lubricated finish for needle heat protection and smooth sewing.
- Excellent bleach, mildew and rot resistance

| Size | Average Strength | Needle Size |
|------|------------------|-------------|
| V92  | 6.6 kg           | 19-22       |
| V138 | 9.5 kg           | 22-25       |
| V207 | 14 kg            | 25-27       |
