

Use Instructions for Bradmill Outdoor Fabrics BrellaGuard® with Bionic Fabric Treatment

Water-Based Fabric Protection Treatment

Stock Code WSBBG

Preparing Article for Treatment:

Bradmill Outdoor Fabrics' Products:

- Remove any dust or dirt by lightly brushing. Severe soiling should be removed with clean, warm water – do not use any soap, detergent or other cleaning agents.
- For mildewed fabric, a pre-treatment with sodium hypochlorite bleach (suitable products include Domestos™ and White King™, diluted 1 part bleach to 3 parts water) is recommended to remove growth and spores (be sure to carefully read and follow any safety instructions outlined by the bleach supplier).
- Apply diluted bleach solution to canvas with a soft brush. Allow to sit for 15 minutes then RINSE THOROUGHLY – insufficient rinsing may result in fabric damage and interfere with water repellency.
- Allow item to dry completely before applying BrellaGuard®.

All other products:

- Follow manufacturer instructions to remove soiling, stains, mildew, soap or other cleaning residue.
- A test for colourfastness in a hidden area is recommended before application.

Preparation:

- Work outdoors, or in a well-ventilated area.
- Select a warm, sunny day to apply treatment.
- Fabric may change colour slightly. Test the effects in an inconspicuous area and allow to dry before assessing results.

Application:

- Spray with an overlapping motion until fabric is evenly wet.
- Allow to dry completely before exposing to moisture, or folding and storing the article.

Drying time:

- Approximately 4-48 hours.

Coverage:

- Depending on weight and absorbency, a 750-ml bottle will cover approximately 7-10 m².

Safety Directions:

- Keep out of children's reach.
- Harmful if swallowed, inhaled or absorbed.
- Avoid contact with skin and eyes.
- Work in a well-ventilated area.
- Do not treat tents, annexes etc., from the inside, and allow to dry completely before occupying.

First Aid:

- If swallowed, do NOT induce vomiting, but give plenty of water or milk and contact doctor or Poisons Information Centre immediately.
- If contacted with skin, wash affected areas with soap and plenty of water.
- If in eyes, flush with water for 15 minutes and seek medical attention.
