

MICROBOX 300 AWNINGS

SMALL IN SIZE, BIG IN SOLUTIONS

- This is a self-protecting awning whose structure makes it ideal for installation on windows.
- The header box helps keep the fabric in perfect condition.
- An elegant and functional structure
- Designed to perfectly integrate the awning with the facade it is mounted on.
- Spring Drop arms.

PRT-07 ARMS

- This system has PRT-07 arms which feature an internal tension transmission system using the ART-SYSTEM's flat and flexible belt.

This system provides significant aesthetic and technical advantages

- It prevents the finish from eroding and reduces friction
- It increases the life span of the awning and also improves its finished look because all of the tension elements are hidden.

Up to 5 Metres wide and 3 Metre Projection

Microbox 300 projects to a maximum of 1.6m at 90°, but thanks to the interior capacity of its cassette - which can hold up to 3m of fabric - inclination can be increased to nearly 180°, enabling it to cover even very tall windows.

- White
- Motorised or Manual
- Wall or Ceiling/Soffit Mounted
- 800mm, 1000mm and 1200mm arms

Fabric Recommendations

Vistaweave PVC coated mesh - plain or striped

RECacril® Acrylic Canvas - plain or striped
