

Use Instructions for Bostik SuperTak® High Performance Adhesive

High Performance, Fast Tack Aerosol Adhesive

Stock Code ADBAHP

Directions for Use:

- Hold the can 6 – 8 inches away from the surface to be sprayed, depress spray tip – with arrow pointed away from the body – and apply a uniform coating.
- To clear spray tip, invert can and spray.
- For porous substrates, applying two coats in the opposite direction of each other will increase bond strength.
- For permanent bonding applications, apply a heavy coat to both surfaces.
- For temporary bonds, apply a light coat to one surface only and bond.
- Read precautions on label before using.
- For best results, apply adhesive at temperatures between 10°C and 43°C (50°F and 110°F).

Storage and Handling:

- **Shelf Life:** One year from ship date.
- **Further Information:** Keep away from sparks, flames or heat. Please refer to MSDS for complete details.
