

Vistaweave is a PVC coated woven polyester mesh designed for outdoor applications. Following this Care & Maintenance guide will maximise the life expectancy and help maintain the fabric's original appearance.

General Cleaning

Regularly clean Vistaweave with a solution of mild soap and water using a soft cloth or soft bristle brush. Rinse thoroughly with fresh water and allow the fabric to dry completely before it is rolled up or stowed away.

Spot Cleaning

Mould and general marking is inevitable for outdoor fabrics. Prompt attention to the affected area will minimise the chance of staining or fabric degradation. If the affected area cannot be cleaned using the general cleaning instructions, clean using a solution of 20 parts water to 1 part domestic bleach with a soft cloth or soft bristle brush. Rinse thoroughly with fresh water immediately after cleaning. Constant cleaning using this method may affect the fabric's life expectancy.

Notes

- Do not use abrasive cloths or cleaners.
- Do not use aggressive cleaners, chemicals or solvents.
- Always allow the fabric to dry completely before it is rolled up or stowed away.
- When in doubt contact your local Nolan Group branch for further advice.
