Reinforced rails 150mm x 120mm x 3mm
give it a solid and elegant look.

Designed and manufactured in Spain. the ATIKA range of retractable pergolas is made of high strength aluminium and steel.

Complemented with RECASENS fabric for the roof, it offers the best combination against the weather and the passage of time.

Atika - the retractable pergola

- Adjustable feet allow the pergola to be levelled on the ground
- Versatility and optimisation of profiles
- Concealed guide brackets, providing a high-quality finish
- Greater flexibility and ease of operation in aligning the guide runners
- Rainwater drainage at the front and side pillars
- LED lighting along the entire length of the profile
- Large modules with a width up to 5m and a projection of up to 7.5m
- New cellular polycarbonate weather cover profile for improved aesthetics and noise reduction.

The integrated LED system illuminates the entire length of the roof profile, creating well-lit and comfortable spaces 24 hours a day.

YOU CAN SELECT FROM A RANGE OF 15 COLOURS FOR THE PERGOLA FRAME
FREE STANDING OR WALL FIXED OPTIONS.
