2019 has snuck up on us. Christmas trees and decorations are all packed away ready to be rehung at years end. Hopefully an enjoyable and restful break was had by one and all. So all that is left to do is to welcome you back to what we hope will be a busy and fulfilling year for everyone. We will endeavour this year to bring more new and exciting products to you as we did in 2018.

Our first offering is our updated website. Please take time to navigate through this and feel free to contact your area manager or customer services team should you have any questions about any of the products that we have displayed.

Holdon® MIDI Clip-On Eyelets

Makes 'eyeleting' applications easier, faster and stronger! The heavier the load – the tighter the grip!

- Pre- assembled – takes seconds to apply, without tools
- Stronger than traditional eyelets
- Grip tested to 100kg*
- Reusable / Relocatable
- Recyclable

The Holdon® gripping function is based on the highly efficient principle of the wedge. As the cord or rope threaded through the eye of the Holdon® is tensioned, it forces the wedge component under the bridge of the sleeve, thus increasing the 'gripping effect' between the wedge and the sleeve gripping area. The more you pull, the tighter it holds. Windy conditions actually increase the grip! Unlike some other clips, Holdon® does not require a hem to enhance the grip.

Available in Black and White.

BKHMIDIBK/WT

Holdon Bungee Hook 15cm

Cord core: Natural rubber multi-strand. Cord diameter 5mm. Black enamelled steel hook. Ideal for use with Holdon Midi Clips.

Available in Black (with enamelled steel hook) and White (with stainless steel hook).

SHH15BK/WT

ReClear Fire Retardent Testing

A common requirement for clear PVC in commercial applications like cafes, restaurants and marquees is for the product to meet a flammability index of less than 12 under the test AS1530 PT2. To offer peace of mind to our customers we have had an external testing company conduct testing on both PVNYC70FR and PVKEC1FR and both products met an index of 1.

Our product specification sheets state the testing results and can be downloaded from our website. If you have any questions around the FR testing or any other product related matters please don't hesitate to get in contact.

Lift the Dot Fasteners

Strong and heavy duty, Lift-The-Dot fasteners lock on three sides and are opened by lifting the fourth side.
