LLAZA BIP SCREEN

It is very strong and durable and its strength has been verified by wind tunnel testing.

It is perfect for exteriors as it prevents heat entering the home.

It affords privacy and visual comfort.

The fabric always stays in the side guides.

It uses clippable guides so no screws or rivets are visible.

Installation can be frontal, ceiling or between two walls.

There is no need to bend down to secure the awning to the ground.

Due to the automatic clip support, installing the roller is practical and it does not need to be disassembled even if the fabric needs changing.

- Available in mill finish.
- Motorised or Manual
- Recommended maximum span 5 metres
