The Llaza Screen system is now available with a Zip finishing option

The Zip system - allows for a tighter screen finish especially on larger screens and when clear PVC is used as the screen fabric. The new zip finishing system comprises of a 5 coil zip which can be welded or sewn to the screen material. This zip slides into a plastic extrusion channel that fits into the screen side channel. The zip and channel have been designed to work together to ensure smooth and taut travel when the screen is raised or lowered.

We have new brochures and installation and assembly instructions to support this new Zip finishing – ask your AM for details.

Did you know?

Lenzip offer a lifetime of the garment/product guarantee on all their zips. Manufactured in the USA since 1946.
