Screen Systems

The latest generation of vertical awnings which allow you to create protection from the elements whilst enjoying the first blooms of spring.

15% off normal book price for orders in September

Two fabric finishing options:

The Zip system - allows for a tighter screen finish especially on larger screens or where clear PVC is used. The new zip finishing system comprises of a 5 coil zip which can be welded or sewn to the screen material. This zip slides into a plastic extrusion channel that fits into the screen side channel. The zip and channel have been designed to work together to ensure smooth and taut travel when the screen is raised or lowered.

The Bip system - patented by LLAZA - is a chain system which is welded into a pocket ensuring that the fabric stays in the side guides.

Both options use clippable guides so no screws or rivets are visible.

Coverlight Fabric Black 90cm x 100m Roll

Non woven spun polypropylene. Used as an economical alternative to calico or silesia. Suitable for various furniture industry uses eg chair, settee bottoms. 50gsm.
